

X SprintPlan 1/6/16

Had to go back to finishing VPN enable.
Back:

Story MPAY-731 is a three (3)

Popup to enter data. Pop up goes away. validation fails, you are no longer looking at your data.
Some NickName for the form

(there is a race condition on background jobs that wake up on timers.)
Jessie wants to break down the scheduler
Background payment submitter

Back ground process wakes up and polls payment ids
with right type of new or retry supposed to go out today or earlier
can we use db record blocking
lock pay make sure it has status necessary

Recovery case where we have set the example retry back to zero
Max fail count 60
Lock is grabbed only for 5 min

{{ Backend will be able to submit future payments }}

Some new job being discussed
DB specific

.
